Vision and Goals

YEAR IN REVIEW

In 2016, we set out to train programming talent partly in a bid to fill the wide talent gap in the our software industry and to create opportunity to work with ground-up talented individuals who can create ground-breaking tools through programming knowledge and technology.

In 2017, we want to employ our collective technical skills to create some of the most ground-breaking technology with ability to make impact in the quality of tools and services obtainable around the world.

Mission

To bring fun and intelligence to daily tools and services through the application of technology.

Vision

To build tools and services that will help achieve our mission.

Core Focus

- Artificial Intelligence
- Education
- Training
- Empowerment

Current In House Projects

- SCI
- Secapay
- Site Bot
- FeedStar
- Security Watch

Client Projects

- HEMA
- AIRVEND
- SPIN2WIN

Projected Focus/Research Areas

- Data Collection
- Education/Learning
